Counterbalance Forklift Trucks
and Warehouse Equipment

WHEN
RELIABILITY IS
EVERYTHING...

 **MITSUBISHI**
FORKLIFT TRUCKS

WHY CHOOSE MITSUBISHI FORKLIFT TRUCKS?

Day in, day out, our distinctive green trucks work away on sites and in warehouses all over the world. Whether it's our forklifts, reach trucks, order pickers, stackers or anything else from our extensive range, they act as the backbone for some of the busiest and most demanding operations around.

And for good reason, too. By keeping thousands of companies at their most productive and efficient, Mitsubishi Forklift Trucks is a name synonymous with quality, reliability, and value for money.

Outstanding products

Our award-winning Research & Development team leads the market in reliability and driveability... while setting green standards for fuel economy and emissions.

Best of all, with more than 170 different models and countless options, we can ensure you get exactly the right truck for your specific needs.

Market-leading support

At Mitsubishi Forklift Trucks, we understand that even the most reliable trucks need top-quality support to keep them working their best. That's why it's an essential part of our unique offering... right across the distribution network.

Every part of the network has been handpicked for its facilities, knowledge and customer commitment, all backed by the global resources of Mitsubishi Forklift Trucks.

Exceptional heritage

Our products benefit from the tremendous heritage, resources and cutting-edge technologies of the Mitsubishi Heavy Industries Group (MHI).

MHI specialises in technologies where performance, reliability and superiority decide your success.

So when we promise you quality, reliability and value for money, you know it's a guarantee we have the power to deliver.

HOW WILL CHOOSING MITSUBISHI FORKLIFT TRUCKS AFFECT MY BOTTOM LINE?

We're committed to helping you streamline your costs. And we do it – across our range – in lots of ways:

Class-leading energy efficiency

Our range of forklifts and warehouse equipment has been engineered to deliver maximum performance, while keeping energy consumption to a minimum.

Our award-winning **EDiA XL** electric truck does more than lead its class on energy efficiency, it outperforms many IC engine trucks, too.

Ergonomically supreme

Our warehouse and counterbalance trucks are built to overcome your everyday challenges through clever innovation and time-saving features.

Our **VELiA** order picker range keeps operators moving freely and comfortably with its whole-platform Operator Presence Sensor.

Exceptionally low maintenance

Low-maintenance components and protective systems ensure your trucks are running at their best for longer... while keeping running costs as low as possible.

Dust and debris can damage your truck's engine. Fortunately, our **GRENDiA ES** doesn't have this problem. It's protected by a belly guard as standard.

Exclusive features

Our designers are never satisfied with just 'excellent'. The team is always looking for the next innovation that will change the way you work for the better.

EDiA EM'S 360-degree steering option eliminates traditional three-point turns. Its smooth, non-stop turning significantly reduces centrifugal force for faster and safer operations.

KEEP YOUR PRODUCTS MOVING

Mitsubishi forklift trucks are valued for their non-stop reliability and low maintenance, but even the best equipment in the world requires servicing from time to time.

We know that truck downtime costs you both time and money. That's why our network offers a range of full and planned service programmes.

We'll work with you to develop a programme of maintenance that is individually tailored to the needs of your trucks and your business.

Cost-effective scheduled support

Planned and Full Maintenance ensures your trucks get cost-effective, scheduled support.

But they're not just preventative – they also save you time and money.

We will work with you to tailor a programme for your specific needs: ensuring your trucks always deliver peak productivity.

We focus on your forklifts, you can focus on your business.

Market-leading warranties

Buying a Mitsubishi forklift truck should mean peace of mind. That's why our warranties are just as dependable as the trucks themselves.

Our standard and extended warranties are designed to lower your operating costs and offer long-term insurance against unexpected repairs. Best of all, the warranty stays with the truck, so if the time comes to sell, you can expect to benefit.

Industry-leading parts provision

At Mitsubishi Forklift Trucks, we're committed to making sure your equipment is repaired quickly every time.

Mitsubishi Forklift Trucks parts are always the best choice and ensure a valid warranty.

Across the network we maintain large stocks of approved parts and – to maximise engineers' first-time fix rate – our central parts facility offers next-day delivery with an industry-leading full-line first-pick rate of 97%.

MITSUBISHI FORKLIFT TRUCKS: IT MAKES GOOD BUSINESS SENSE

**Choosing Mitsubishi
Forklift Trucks is
choosing a strong return
on your investment.**

Ours is a unique proposition: award-winning trucks, local support, global backing. It's this combination that makes companies around the world put their trust in us to deliver, time after time after time.

Every product that bears our name has been designed to keep your operators more protected, your work more productive, and your company more profitable. By rethinking what's possible, our team has found new and better ways to work, and keep Mitsubishi trucks at the forefront of forklift technology.

But that only means so much without the right support. We hold our engineers to the very highest standards so you can be confident they'll be up to the job. Through training, technical backing, and our global parts network, we support them so they can support you.

WHEN RELIABILITY IS EVERYTHING...

Like any product bearing the Mitsubishi name, our materials handling equipment benefits from the tremendous heritage, huge resources and cutting-edge technology of one of the world's largest corporations – Mitsubishi Heavy Industries Group.

Engineering spacecraft, jet planes, power plants and more, MHI specialises in those technologies where performance, dependability and superiority decide your success or failure...

So when we promise you quality, reliability and value for money, you know it's a guarantee we have the power to deliver.

YOU'LL NEVER WORK ALONE

As your local Mitsubishi Forklift Trucks distributor, we are here to keep your trucks working – through our extensive experience, our technical excellence and our commitment to customer care.

We are your local experts, backed by efficient channels to the entire organisation of Mitsubishi Forklift Trucks.

No matter where you are, we are close by – with the capability to meet your needs.

Performance specifications may vary depending on standard manufacturing tolerances, vehicle condition, types of tyres, floor or surface conditions, applications or operating environment. Trucks may be shown with non-standard options.

Specific performance requirements and locally available configurations should be discussed with your distributor.

We follow a policy of continual product improvement. For this reason, some materials, options and specifications could change without notice.
