

EDiA EM

FB14-20A(C)N(T) Series

ELECTRIC-POWERED FORKLIFT TRUCKS

1.4 – 2.0 tonnes

**THE MOST INTELLIGENT...
THE MOST AGILE**

Meet the EDiA EM. It's the most intelligent truck on the market and one of the most durable. Packed with features, it delivers the manoeuvrability, power and reliability you expect from Mitsubishi Forklift Trucks.

**WHEN
RELIABILITY IS
EVERYTHING...**

EDiA EM

FB14-20A(C)N(T) Series

ELECTRIC-POWERED FORKLIFT TRUCKS

1.4 – 2.0 tonnes

Designed and engineered to perform, these 48-volt three and four-wheel electrics work intuitively, tailoring their performance to your individual operator.

EDiA EM's sophisticated software analyses behaviour in real-time and automatically adjusts the truck's behaviour for safe-but-productive performance.

OPERATOR COMPARTMENT AND CONTROLS

- **Large, ultra-comfortable operating space** has been enhanced to meet the needs of drivers of all shapes and sizes for fatigue-free operation.
- **Spacious footwell** accommodates size 50+ (EU) shoes ensuring – whatever their size – operators enjoy a natural, ergonomic foot position.
- **Extra-large and low entry step** with offers good grip, ensuring safe, no-slip entry and exit – whatever the footwear.
- **Unparalleled 360° visibility** thanks to optimised mast, wheel, dashboard and counterweight design, maximises visibility to load, forks, front and rear wheels for safe, confident operation in tight spaces.
- **Optimised pedal positioning** encourages a more natural foot position for drivers of all sizes – short and tall included – to keep fatigue at bay.
- **Clear informative full-colour display** is easy to read from any angle (even direct sunlight). It's perfectly positioned for operator reference and doesn't reduce the truck's all-round visibility.

- **Touch-sensitive fingertip controls** are spring-loaded for a natural feeling; the gentler the touch, the finer the control.

FRAME AND BODY

- **High visibility design** offers minimal 'death angle' for improved safety, while eliminating unnecessary driver movements to keep drivers fresh.
- **Fast-access battery compartment** offers easy opening for maximum ventilation during charging and quick battery checks and maintenance.

MAST AND FORK ASSEMBLY

- **Passive Sway Control** dampens any elevated load motion above 3.5 m by compensating with micro chassis movements.

DRIVE

- **High-efficiency motors** offer a high RPM range for precise control when accelerating.
- **Sensitive Drive System (SDS)** smooths start and stop movements, increases agility and adapts to the speed of operators' foot movements.
- **Intelligent curve control** senses the angle of a turn and responds – automatically reducing speed early in the manoeuvre – ensuring maximum stability and accurate, positive cornering.
- **>100° steering axle** with dual-drive motors offers smooth 'on the spot' turning, with no initial 'push'.

BRAKES

- **Electronic magnetic brakes** don't rely on brake pads – eliminating associated maintenance and the risk of brake dust and contamination.
- **Automatic parking brake with hill hold** stops the truck automatically when the accelerator is not engaged, and prevents rolling on ramps – no remembering to use a handle or switch.

HYDRAULICS

- **Load-sensing hydraulic system** automatically adjusts truck's performance when handling loads at heights above 2.0 m – for consistently safe and efficient operations, standard for masts from 3.5m.

STEERING SYSTEM

- **Optimised steering** automatically adjusts power to steering for consistently smooth operations – regardless of speed or work intensity – for maximum control, comfort and safety.
- **Time-saving 360° steering on 3-wheel models** means the operator keeps the truck in constant motion – saving seconds on every turn.

OPTIONAL LI-ION BATTERY SYSTEMS

MAKE YOUR FORKLIFT (AND ITS FUEL) GO EVEN FURTHER

Tried, tested and proven in the field, lead-acid batteries have been the long-standing top choice for companies employing electric lift trucks. However, with long charging times, demanding maintenance requirements, the need for extra batteries and high risk of operator misuse, it can be a challenge. Fortunately, there's a new battery system on the block: Li-ion from Mitsubishi Forklift Trucks.

Designed to meet your business' demands - including multi-shift (24/7) operations - without the need for spare batteries, our high-performance Li-ion battery system is up to 40 per cent more efficient than lead-acid counterparts. Plus, it's virtually error-proof, thanks to its ultra-low-maintenance design which prevent cell damage.

- **Exceptional, zero-emissions efficiency** 40% more efficient than lead-acid batteries and free from gases.
- **Ultra-low maintenance design** demands just a full charge each week to activate cell balancing, as well as an annual CSV export/update.
- **No space required** with no need for charging areas, there's no cost for set up and you can keep your profitable space just that: profitable.
- **Quick charge capabilities** mean that just 15 minutes is all your battery needs to keep your truck going a few more hours. (It only takes 1 to 2 hours to fully charge a completely discharged battery.)
- **Higher sustained voltage** ensures more consistent lifting and driving performance, which is particularly noticeable towards the end of a shift.
- **TriCOM Technology** delivers exceptionally high system efficiency (up to 97%).
- **Water-free design** with no water in the battery and no need to top up, there's no risk of operators damaging cells.
- **Active protection componentry** this continuously monitors the system, highlighting potential issues, including misuse.
- **Short circuit protection** is offered by system safeguards including: deep-discharge and overcharge protection, individual cell temperature and voltage monitoring.
- **On-the-go performance and monitoring** is possible thanks to the system's integrated monitoring system with easy-to-read display unit, as well as an opportunity charger on board.

Battery capacity, Ah	260	312	416
Charger capacity, Ah, 1hour	200	250	350

*With battery exchange rolls

- Ast = Wa + R + a
- Ast = Working aisle width
- Wa = Turning radius
- a = Safety clearance = 2 x 100 mm
- R = $\sqrt{(l6 + x)^2 + (b12 / 2 - b13)^2}$
- b12 = Pallet width (1200 mm)
- h1 = Height with mast lowered
- h2 = Standard free lift
- h3 = Lift height
- h4 = Height with mast raised
- h5 = Full free lift
- Q = Lifting capacity, rated load
- c = Load centre (distance)

Capacities at various load centres

Simplex - h3 = 3700 mm

ELECTRIC-POWERED FORKLIFT TRUCKS

1.4 – 2.0 tonnes

WHEN RELIABILITY IS EVERYTHING...

EDiA
THE ELECTRIC DIAMOND

The family name EDiA appears proudly on our award-winning range of electric forklift trucks.

The reputation that Mitsubishi Forklift Trucks enjoys for endurance and reliability has likened them to the quality and enduring value of a diamond.

Like any product bearing the "MITSUBISHI" name our materials handling equipment benefits from the tremendous heritage, huge resources and cutting-edge technology of one of the world's largest corporations – Mitsubishi Heavy Industries Group.

Engineering spacecraft, jet planes, power plants and more, MHI specialises in those technologies where performance, dependability and superiority decide your success or failure...

So when we promise you quality, reliability and value for money, you know it's a guarantee we have the power to deliver.

That's why every model in our award-winning and comprehensive range of lift trucks and warehouse equipment is built to a high specification – to ensure it keeps working for you. Day after day. Year after year. Whatever the job. Whatever the conditions.

YOU'LL NEVER WORK ALONE

As your local authorised dealer, we are here to keep your trucks working – through our extensive experience, our technical excellence and our commitment to customer care.

We are your local experts, backed by efficient channels to the entire organisation of Mitsubishi Forklift Trucks.

No matter where you are, we are close by – with the capability to meet your needs.

Discover how Mitsubishi Forklift Trucks give you more from your local authorised dealer or when you visit our website www.mitforklift.com

Performance specifications may vary depending on standard manufacturing tolerances, vehicle condition, types of tyres, floor or surface conditions, applications or operating environment. Trucks may be shown with non-standard options. Specific performance requirements and locally available configurations should be discussed with your distributor of Mitsubishi forklift trucks. We follow a policy of continual product improvement. For this reason, some materials, options and specifications could change without notice.
