

SENSiA **EM**

REACH TRUCKS

1.4 - 2.5 tonnes

REACH NEW HEIGHT... OF PERFORMANCE AND PRODUCTIVITY

SENSiA EM is designed for effective and efficient operations. Its highly sensitive control system and progressive, modulated fingertip response curves allow operators to work with complete accuracy and confidence.

SPECIFICATIONS

RB14N2S	RB16N2H
RB14N2HS	RB16N2C
RB16N2S	RB16N2HC
RB16N2HS	RB20N2H

	RB25N2X

WHEN
RELIABILITY IS
EVERYTHING...

RB14-25N2 Series

SENSiA EM

RB14-25N2 Series

REACH TRUCKS

1.4 – 2.5 tonnes

A choice of two operating modes means SENSiA EM can be adapted for different operators. PRO mode is ideal for experienced warehouse staff looking for optimum performance, while ECO mode puts novice operators at ease with natural handling. SENSiA EM can even be customised by a service engineer to ensure that the truck's settings suit specific needs.

The generous cabin space and ergonomic armrest ensure operators stay comfortable, safe and focused, even through the longest shifts.

BRAKES

- **High-efficiency regenerative braking**
This gives more effective control and reduces brake wear
- **Load wheel brakes**
These give extra braking power (H and X models only)..

DRIVE

- **Powerful AC drive motor**
High torque, even at faster speeds. Efficient, smooth, and quiet performance which lowers service costs.
- **Choice of two operation modes (ECO and PRO)**
The truck's performance can be tailored for enhanced performance or extended shift life.
- **High-efficiency drive motors and hydraulic systems**
Exceptional shift length between charges or changes.

- **Cornering control**
Even at fast travel speeds cornering is efficient and stable
- **Mitsubishi SDS (Sensitive Drive System)**
An intuitive driver-assist system for increased safety. Performance is managed according to steer angle and the velocity of foot and finger controls

ELECTRICAL AND CONTROL SYSTEMS

- **Award-winning Active Sway Control (ASC) (option)**
Delays caused by mast sway are reduced and performance is smoother and more stable.
- **CAN bus system**
Less wiring for quick and easy fault finding.
- **Maintenance interval calculator**
This helps to encourage correct regular servicing to minimise potential downtime.
- **Temperature control**
This prevents motors and controllers from sustaining damage from overheating.
- **Tilting battery cover**
Quick, easy access for maintenance and charging.
- **Battery rollers**
Changes are quick, easy and safe.

FORKS AND MAST

- **Revolutionary VisionMast**
The operator gets unrivalled forward vision
- **Clear-view fork carriage**
This has integral side-shift and offers optimal visibility of forks at the first stacking level.
- **Exceptionally smooth 'no knock' transition between mast stages**
Exact performance is ensured throughout lift range.
- **Passive Sway Control**
The chassis moves slightly to compensate for elevated load motion and dampen it.

SENSiA EM

RB14-25N2 Series

REACH TRUCKS

1.4 – 2.5 tonnes

FRAME AND BODY

- **Clear-view overhead guard**
Great visibility while still offering high levels of overhead protection.

HYDRAULICS

- **Powerful AC hydraulic motor with extra-strength pump (H models)**
Lifting and lowering is fast and controlled.

OPERATOR COMPARTMENT AND CONTROLS

- **Spacious and comfortable cabin, clear view and fast, accurate fork positioning**
This all helps to increase productivity and reduce risks of driver fatigue - even on the longest shifts.
- **Easy-access compartment**
This features ergonomic hand bars, low non-slip step and entry provides safe and effortless entry and exit.
- **Folding steering wheel console**
Length and angle of column are adjustable to give each operator the optimal driving position. Lifts up for easy exit and entry of the cabin.
- **Multifunctional armrest controls**
Operators' arm is well supported and cuts down on unnecessary movement. Controls for reach, lift, tilt, fork positioning, direction and horn all within easy reach.
- **Full-suspension, fully adjustable seat**
Drivers are kept safe, comfortable, and alert through long shifts.
- **Clear information display**
The driver is given key information such as guidance, warning, and alarms.
- **Low-noise technology**
The sound level at the driver's ear is no louder than a typical conversation.
- **Ergonomic armrest**
Adjustable and matches natural operating position to reduce fatigue.
- **Fingertip control system**
Patented with modulated response curves and optimised for natural movement with effortless control.

STEERING SYSTEM

- **Unlimited 360-degree progressive electric steering**
Manoeuvring is easy at low speeds and offers effortless control at higher speeds.

SENSIA EM

OPTIONAL LI-ION BATTERY SYSTEMS

MAKE YOUR FORKLIFT GO EVEN FURTHER

Tried, tested and proven in the field, lead-acid batteries have been the long-standing top choice for companies employing electric lift trucks. However, with long charging times, demanding maintenance requirements, the need for extra batteries and high risk of operator misuse, it can be a challenge. Fortunately, there's a new battery system on the block: Li-ion from Mitsubishi Forklift Trucks.

Designed to meet your business' demands - including multi-shift (24/7) operations - without the need for spare batteries, our high-performance Li-ion battery system is up to 30% more efficient than lead-acid counterparts. Plus, it's virtually error-proof, thanks to its ultra-low-maintenance design.

- **Gas-emission free and space efficient operation**
with no need for air ventilation and/or closed charging room.
- **Exceptional high battery & charger efficiency**
due to state-of-the-art technology, delivers up to 30% more power efficiency than lead-acid batteries.

- **Maintenance free design**
Eliminates the need for daily checks and water re-fills by operator, and reduces the risk of operators damaging cells.
- **No spare batteries and charging room required**
saves space and costs in multi-shift application to maximise profitability.
- **Quick charge capabilities**
mean that just 15 minutes is all your battery needs to keep your truck going a few more hours. (It only takes from 1 hour to fully charge a completely discharged battery.)
- **Higher sustained voltage**
ensures more consistent lifting and driving performance, which is particularly noticeable towards the end of a shift.
- **Active protection componentry**
this continuously monitors the system, highlighting potential issues, including misuse.

- **High safety features include**
Short circuit protection, deep-discharge and overcharge protection, individual cell temperature and voltage monitoring.
- **On-the-go performance and monitoring**
is possible thanks to the system's integrated monitoring system with easy-to-read display unit.
- **Wide choice of battery and charger capacities**
The most suitable power supply can be matched to the exact requirements of a specific application.

Fully integrated Li-ion battery

Features a sophisticated CANbus communication and an automatic ON/OFF synchronization between battery and truck. Battery level, notifications and alarms are integrated into the truck display, to secure clear and easy overview for the truck operator.

Ast = Working aisle width with load
Ast = Wa + R + a
Ast3 = Working aisle width (b12<1000 mm)
Ast3 = Wa + l6 - x + a
Wa = Turning radius
R = $\sqrt{(l6 + x)^2 + (b12 / 2 - b13)^2}$
a = Safety clearance = 2 x 100 mm
l6 = Pallet lenght (1200 mm)
x = Load wheel axle to fork face
b12 = Pallet width (800 or 1000 mm)
Q = Lifting capacity, rated load
c = Load centre (distance)

WHEN RELIABILITY IS EVERYTHING...

SENSiA
TOTAL DRIVER
CONTROL

Instant driveability, thanks to custom performance modes, means our SENSiA reach truck offers class leading performance... in any workplace.

With a wealth of smart design features, including revolutionary fingertip controls, sway control systems and 360-degree visibility, SENSiA provides operators unparalleled comfort, unrivalled support ... and absolute control.

Like any product bearing the "MITSUBISHI" name our materials handling equipment benefits from the tremendous heritage, huge resources and cutting-edge technology of one of the world's largest corporations – Mitsubishi Heavy Industries Group.

Engineering spacecraft, jet planes, power plants and more, MHI specialises in those technologies where performance, dependability and superiority decide your success or failure...

So when we promise you quality, reliability and value for money, you know it's a guarantee we have the power to deliver.

That's why every model in our award-winning and comprehensive range of lift trucks and warehouse equipment is built to a high specification – to ensure it keeps working for you. Day after day. Year after year. Whatever the job. Whatever the conditions.

YOU'LL NEVER WORK ALONE

As your local authorised dealer, we are here to keep your trucks working – through our extensive experience, our technical excellence and our commitment to customer care.

We are your local experts, backed by efficient channels to the entire organisation of Mitsubishi Forklift Trucks.

No matter where you are, we are close by – with the capability to meet your needs.

Discover how Mitsubishi Forklift Trucks give you more from your local authorised dealer or when you visit our website www.mitforklift.com

Performance specifications may vary depending on standard manufacturing tolerances, vehicle condition, types of tyres, floor or surface conditions, applications or operating environment. Trucks may be shown with non-standard options. Specific performance requirements and locally available configurations should be discussed with your distributor of Mitsubishi forklift trucks. We follow a policy of continual product improvement. For this reason, some materials, options and specifications could change without notice.
