

RBM20-25N3 Series

4-WAY REACH TRUCKS

2.0 - 2.5 tonnes

**STRONG, STABLE, SWIFT...
EVEN IN SMALL SPACES**

The RBM20-25N3 Series of four-way reach trucks is an ideal choice if you're looking for a smart, flexible, and highly ergonomic reach truck that can deal with long or bulky goods with ease.

SPECIFICATIONS

RBM20N3
RBM25N3

**WHEN
RELIABILITY IS
EVERYTHING...**

RBM20-25N3 Series 4-WAY REACH TRUCKS

2.0 – 2.5 tonnes

Equally capable of handling long loads and standard pallets, the RBM20-25N3 Series offers lift heights up to 9.7 metres. As it's four-way and can carry long loads sideways, aisles can be kept to a minimum, allowing you to maximise storage space.

With a long battery life and a suite of operator-focused features available, it makes lengthy shifts a breeze for both truck and driver. Exceptional all-round visibility and stability aides allow operators to work with greater confidence and safety. Combined with a top speed of 13 km/h this makes for an incredibly efficient and productive truck.

DRIVE

- **Intelligent Cornering System**
The truck senses the angle of a turn and reduces speed early for maximum stability and accurate, positive cornering.
- **Active Spin Reduction (ASR)**
Helps to stop the drive wheel spinning. This minimises grip loss while also reducing wear on the wheel.
- **Durable drive wheel**
Low-wear drive wheel means less maintenance and lower costs.

ELECTRICAL AND CONTROL SYSTEMS

- **On-board diagnostics and fault memory folder**
Speed up servicing and help prevent damage.
- **Quick battery inspection**
Battery is on steel rollers for ease of inspection.
- **Advanced on-board computer**
Stores power and hydraulic preference settings for up to 350 different users.
- **Built-in Li-ion battery (option)**
Fast opportune charging removes the need for extra batteries and allows 24/7 operation.
- **Stability Support System (S3)**
Hydraulic functions such as mast reach and mast tilt are automatically optimised along with a reach damping function to make pallet placement and retrieval safer and quicker.
- **S3 - 2**
Works to adjust maximum travel speed in relation to actual load weight for the best levels of safety and performance.

FORKS AND MAST

- **MaxVision mast and overhead guard**
These maximise operator field of vision for increased productivity and safety.
- **Level Assistance System (option)**
This patented system detects the operator's intention and automatically stops when the forks are at precisely at the right level.
- **Mast Tilt Control (MTC)**
The automatic damping function absorbs unwanted mast movements, reduces the speeds of tilt, side shift and angle, and ensures 80 percent faster mast stabilisation.

RBM20-25N3 Series 4-WAY REACH TRUCKS

2.0 – 2.5 tonnes

FRAME AND BODY

- **Modular design**
Limits the number of parts used meaning service engineers can carry fewer parts to keep the first-time fix rate incredibly high.
- **RapidAccess features**
These allow quick and easy entry to all areas for checks and maintenance.

HYDRAULICS

- **Soft Motion**
A finely tuned algorithm adjusts reach, tilt and sideshift speed to greatly improve productivity and handling speed.

OPERATOR COMPARTMENT AND CONTROLS

- **Electrically adjustable floor height**
Can be adjusted to suit each operator and provide a more ergonomic seating position.
- **Weight indicator**
Displays the load weight as well as the option to add multiple weights of up to 100kg.
- **Tilting seat with ergonomic backrest**
Drivers are kept safe, comfortable, and alert through long shifts.
- **Heated cabin (option)**
Makes for more comfortable operation in cold environments.
- **Spacious and comfortable cabin, clear view and fast, accurate fork positioning**
This all helps to increase productivity and reduce risks of driver fatigue - even on the longest shifts.
- **Easy-access compartment**
Includes ergonomic hand bars, low non-slip step and wide entry to provide safe and effortless entry and exit.
- **Multifunctional Ergologic Joystick**
This intuitive and highly ergonomic joystick controls seven different functions, including lifting, lowering, reaching and tilting.
- **Automotive-style pedals**
Pedals are placed in a familiar position for intuitive operation.
- **PIN-code access**
Stops unauthorised truck use and keeps you aware of who's operating at all times.
- **Optional fingertip hydraulic controls**
Integrated, fully adjustable, and allows effortless precision.

STEERING SYSTEM

- **Mini steering wheel with floating armrest**
Ergonomically adjustable to reduce strain and lower risk of RSI.
- **Synchronised steering mode**
Allows for quick changes in travel direction.
- **360-degree steering**
The operator can keep the truck in constant motion — saving seconds on every turn.
- **Midi steering wheel (option)**
Adjustable positioning with tilt function.

OPTIONAL LI-ION BATTERY SYSTEMS

MAKE YOUR FORKLIFT GO EVEN FURTHER

Tried, tested and proven in the field, lead-acid batteries have been the long-standing top choice for companies employing electric lift trucks. However, with long charging times, demanding maintenance requirements, the need for extra batteries and high risk of operator misuse, it can be a challenge. Fortunately, there's a new battery system on the block: Li-ion from Mitsubishi Forklift Trucks.

Designed to meet your business' demands - including multi-shift (24/7) operations - without the need for spare batteries, our high-performance Li-ion battery system is up to 30% more efficient than lead-acid counterparts. Plus, it's virtually error-proof, thanks to its ultra-low-maintenance design.

- **Gas-emission free and space efficient operation**
with no need for air ventilation and/or closed charging room.
- **Exceptional high battery & charger efficiency**
due to state-of-the-art technology, delivers up to 30% more power efficiency than lead-acid batteries.

- **Maintenance free design**
Eliminates the need for daily checks and water re-fills by operator, and reduces the risk of operators damaging cells.
- **No spare batteries and charging room required**
saves space and costs in multi-shift application to maximise profitability.
- **Quick charge capabilities**
mean that just 15 minutes is all your battery needs to keep your truck going a few more hours. (It only takes from 1 hour to fully charge a completely discharged battery.)
- **Higher sustained voltage**
ensures more consistent lifting and driving performance, which is particularly noticeable towards the end of a shift.
- **Active protection componentry**
this continuously monitors the system, highlighting potential issues, including misuse.
- **High safety features include**
Short circuit protection, deep-discharge and overcharge protection, individual cell temperature and voltage monitoring.
- **On-the-go performance and monitoring**
is possible thanks to the system's integrated monitoring system with easy-to-read display unit.
- **Wide choice of battery and charger capacities**
The most suitable power supply can be matched to the exact requirements of a specific application.

Fully integrated Li-ion battery

Features a sophisticated CANbus communication and an automatic ON/OFF synchronization between battery and truck. Battery level, notifications and alarms are integrated into the truck display, to secure clear and easy overview for the truck operator.

WHEN RELIABILITY IS EVERYTHING...

Like any product bearing the "MITSUBISHI" name our materials handling equipment benefits from the tremendous heritage, huge resources and cutting-edge technology of one of the world's largest corporations – Mitsubishi Heavy Industries Group.

Engineering spacecraft, jet planes, power plants and more, MHI specialises in those technologies where performance, dependability and superiority decide your success or failure...

So when we promise you quality, reliability and value for money, you know it's a guarantee we have the power to deliver.

That's why every model in our award-winning and comprehensive range of lift trucks and warehouse equipment is built to a high specification – to ensure it keeps working for you. Day after day. Year after year. Whatever the job. Whatever the conditions.

YOU'LL NEVER WORK ALONE

As your local authorised dealer, we are here to keep your trucks working – through our extensive experience, our technical excellence and our commitment to customer care.

We are your local experts, backed by efficient channels to the entire organisation of Mitsubishi Forklift Trucks.

No matter where you are, we are close by – with the capability to meet your needs.

Discover how Mitsubishi Forklift Trucks give you more from your local authorised dealer or when you visit our website www.mitforklift.com

Performance specifications may vary depending on standard manufacturing tolerances, vehicle condition, types of tyres, floor or surface conditions, applications or operating environment. Trucks may be shown with non-standard options. Specific performance requirements and locally available configurations should be discussed with your distributor of Mitsubishi forklift trucks. We follow a policy of continual product improvement. For this reason, some materials, options and specifications could change without notice.
